($\frac{1}{4}$ " - 20 $\frac{1}{2}$ ")

Hex Key / Allen Key

4x Screws
(M2.5 x 8)

Screwdriver

Wrench

LIFT THOR SC
PRO ENTERPRISE

How to assemble:

Remove the protective sticker from your Smart Controller to access the screw points

Align the mount with your Smart Controller to secure it in place with the (4x) screws provided. Make sure to place all 4 screws before tightening them properly

To have better access of the rear screws loosen up the top part of the utility mount with the hex key and wrench provided. **Remember** to tighten it back to lock its position once you have mounted the Monitor / Tablet

Now your utility mount is properly installed!

Use the provided tripod knob to secure a monitor in place* by threading the knob through the middle hole of the top plate.

We recommend the use of a quick release bracket for convenience.
- sold separately

OR mount the tablet clamp to use in conjunction with a tablet by tightening the tripod knob through the middle hole on the top plate to secure it in place*

*If needed use a 6mm washer

The clamp has two mechanisms to ensure your tablet sits secure and in place.

The first mechanism is the ratchet part, to adjust to the size of your tablet. We recommend setting it a little smaller (1" / 2.5cm) than the actual size of the tablet for a tighter, secure fit.

Once you have selected the right height lock the ratchet in place by sliding the lock downwards.

Place the tablet in landscape mode by pulling the spring mechanism upwards and release it to secure the tablet in place. You can adjust the top clamp tabs, if needed, to avoid pressing on any buttons

*Scan the QR code
with your phone for
a video tutorial

Scan the QR code, by opening the camera app on your smart phone or tablet device.

Point your camera at the QR code.

Tap the banner that appears on your device to open the tutorial video in YouTube

The tablet clamp is compatible with most small tablets like iPad Mini or similar up to larger tablets like the iPad Pro 12.9" and everything in between
